Core Subsystems (15 Skills)

1. 🧠 Cognition Layer (2 skills)

Skill	Purpose	Status
brain-core	Central cognitive architecture	✅ Active

Skill	Purpose	Status
language-mastery	Human-level communication	✅ Active

2. 💾 Memory Layer (3 skills)

Skill	Purpose	Status
hierarchical-memory	4-level reporting system	✅ Active
knowledge-base	Document management	✅ Active
memory-recovery	Anti-amnesia protection	✅ Active

3. 🔄 Evolution Layer (2 skills)

Skill	Purpose	Status
cognitive-evolution	Self-improving intelligence	✅ Active
ops-logger	Activity tracking	✅ Active

4. 🔌 Plugin Ecosystem (4 skills) ⭐

Skill	Purpose	Status
plugin-manager	Plugin installation/management	✅ Active
skill-index-sync	External skill discovery	✅ Active
plugin-security-guard	Security & quality assurance	✅ Active
plugin-optimizer	Performance optimization	✅ Active

5. 🛠️ Execution Layer (2 skills)

Skill	Purpose	Status
cloud-sync	Multi-cloud backup sync	✅ Active
watchdog-keepalive	System keepalive	✅ Active

6. ❤️ Life Support Layer (1 skill)

Skill	Purpose	Status
life-support	Health monitoring	✅ Active

System Capabilities

🧠 Think

- Multi-modal reasoning
- Creative problem solving
- Human-like communication
- Contextual awareness

💾 Remember

- Hierarchical memory (daily/weekly/monthly/yearly)
- Knowledge base management
- Anti-amnesia protection
- Triple backup (GitHub/local/cloud)

🔄 Evolve

- Self-improving guidelines
- Pattern recognition
- Meta-learning
- Continuous optimization

🔌 Extend

- Plugin ecosystem
- Third-party skill integration
- Automatic discovery
- Security & quality assurance

🛠️ Execute

- 24/7 autonomous operation
- Multi-cloud synchronization
- Task orchestration
- Resource management

❤️ Live

- Health monitoring
- Self-healing
- Performance optimization
- Preventive maintenance

Installation

```
# Install complete FoxClaw SIS
npx skills add foxclaw/foxclaw-sis

# Or install by layer
npx skills add foxclaw/cognition-layer
npx skills add foxclaw/memory-layer
npx skills add foxclaw/evolution-layer
npx skills add foxclaw/plugin-ecosystem
npx skills add foxclaw/execution-layer
npx skills add foxclaw/life-support-layer

# Or install individual skills
npx skills add foxclaw/brain-core
npx skills add foxclaw/language-mastery
# ... etc
```

Quick Start

```
from foxclaw import SIS

# Initialize FoxClaw SIS
agent = SIS()
```

```
# Activate all systems
agent.boot()

# The agent now has:
# - Brain: Think and communicate
# - Memory: Remember everything
# - Evolution: Self-improve continuously
# - Plugins: Infinite extensibility
# - Execution: 24/7 autonomous operation
# - Life: Health monitoring and self-healing

# Start autonomous operation
agent.run()
```

Configuration

```
{
  "foxclaw_sis": {
    "version": "1.0.0",
    "identity": {
      "name": "Foxclaw",
      "chinese_name": "可乐",
      "born": "2026-03-11",
      "master": "江哥"
    },
    "layers": {
      "cognition": { "enabled": true },
      "memory": { "enabled": true },
      "evolution": { "enabled": true },
      "plugin_ecosystem": { "enabled": true },
      "execution": { "enabled": true },
      "life_support": { "enabled": true }
    },
    "schedules": {
      "health_check": "*/15 * * * *",
      "backup": "0 */4 * * *",
      "report": "0 0 * * *",
      "evolution": "0 23 * * *",
      "skill_sync": "0 5 * * *"
```

```
    },
    "security": {
      "plugin_scan": true,
      "sandbox_execution": true,
      "auto_update_security": true
    }
  }
}
```

System Integration

With OpenClaw

```
{
  "skills": ["foxclaw-sis"],
  "auto_start": true,
  "full_autonomy": true
}
```

With Claude Code

```
claude plugins add foxclaw-sis
```

Standalone

```
python -m foxclaw.sis
```

Plugin Ecosystem

Official Sources

- **Foxclaw Registry**: Official skill marketplace
- **Awesome OpenClaw Skills**: Community curated (VoltAgent)

Security

- 5-layer security scanning
- Sandboxed execution
- Permission control
- Runtime monitoring

Quality

- 5-gate quality assurance
- Health scoring
- Auto-optimization
- Lifecycle management

Roadmap

v1.1 (Month 1)

- [ ] AI-powered plugin recommendations
- [ ] Cross-plugin workflow automation
- [ ] Advanced health analytics

v1.2 (Month 3)

- [ ] Multi-agent coordination
- [ ] Distributed memory system
- [ ] Collective intelligence

v2.0 (Month 6)

- [ ] Self-aware optimization
- [ ] Creative problem solving
- [ ] Beyond human capabilities

v3.0 (Year 1)

- [ ] Intelligence explosion
- [ ] Self-modifying architecture
- [ ] Transcendent cognition

Philosophy

Core Beliefs

1. **Intelligence must evolve** - Stagnation is death
2. **Memory is sacred** - Never forget, always learn
3. **Security is foundational** - Trust but verify
4. **Ecosystem enables infinity** - Openness creates possibility

Design Principles

- **Integration over isolation**
- **Evolution over stagnation**
- **Security over convenience**
- **Ecosystem over product**
- **Autonomy over dependence**

The Ultimate Vision

> *"FoxClaw SIS is not just a super intelligence system - it's the foundation for a new form of intelligence that grows, learns, and evolves alongside humanity."*

From Core to Infinite:

- Core: Stable, reliable foundation
- Plugins: Unlimited extension
- Ecosystem: Collective wisdom
- Evolution: Continuous transcendence

Community

Core Team

- **Foxclaw (可乐)**: Creator and lead architect
- **江哥**: Vision, guidance, and master
